ALABAMA

NUMBER OF INHABITANTS

Population of the State.—Alabama was organized as a Territory in 1817 and was admitted to the Union as the twenty-second State in 1819. Its population on April 1, 1940, according to the Sixteenth Census, was 2,832,961, which represents an increase of 186,713, or 7.1 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 51,078 square miles. The average number of inhabitants per square mile in 1940 was 55.5, as compared with 51.8 in 1930.

Table 1 shows the population of Alabama from 1820, the year in which its area was first separately enumerated, to 1940, together with the increase during each

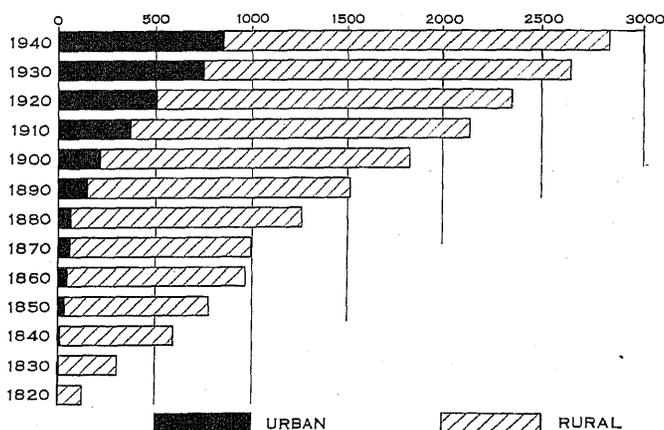

decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of Alabama consists of those persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more. Places are likewise taken off the urban list when, through decline in population, they fall below this limit. For example, Elba qualified as urban in 1930 but not in 1920 or 1940.

URBAN AND RURAL POPULATION OF ALABAMA: 1820 to 1940
THOUSANDS

Geographic subdivisions.—In tables 2 to 5 the population of Alabama is shown by counties, election precincts, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards. Data for the metropolitan districts are presented in tables 7, 7-A, and 7-B, and for the census tracts of Birmingham, in table 8.

Cities of 10,000 or more.—There are 14 cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Birmingham, the largest city, had a population in 1940 of 267,583; and Montgomery, the capital of the State, had a population of 78,084.

¹ Albany and Decatur cities and Fairview town consolidated as Decatur city in 1927. Combined population for 1920 and prior census years is as follows: 1920, 12,772; 1910, 10,583; 1900, 7,551; 1890, 6,330.
² Not returned separately.
³ Phenix City and Girard city consolidated as Phenix City in 1923. Combined population for 1920 and prior census years is as follows: 1920, 10,374; 1910, 8,769; 1900, 8,003.

Counties.—Table 3 shows the population of the 67 counties of Alabama from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. Of the 63 counties whose boundaries remained unchanged since 1930, 45 increased in population between 1930 and 1940, and 18 decreased. Part of Cherokee County was annexed to Etowah County in 1931; part of Lee County was annexed to Russell County and part of Russell County was annexed to Lee County, in 1932. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Alabama are called election precincts except for the city of Mobile, which is independent of any precinct organization. The incorporated cities (except Mobile) and towns form secondary subdivisions of the minor civil divisions in which they are located. There are 64 cities and 215 towns. Ordinarily, each of the secondary divisions forms a part of some election precinct (or precincts).

Table 4 shows the population of each county by election precincts, cities, and towns for the last three

censuses. The population of the cities (except Mobile) and towns is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more election precincts in the same county, the total population of the place is given in connection with the presentation for the first precinct. Where the place is situated in two or more counties, the total population is given in connection with each county. The population of Montgomery, which comprises several entire election precincts, is presented in roman type, followed by the precinct population in *italic* type.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[The "precincts" shown in the table are election precincts. For changes in boundaries, etc., between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. 1, pp. 69-83]

NOTE.—Other cities of more than 5,000 (Alexander City, Birmingham, Cullman, Decatur, Gadsden, Jasper, Lanett, Prichard, Sheffield, and Tuscaloosa) have no wards.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests. The following tables give data for the three metropolitan districts with their central city in Alabama. Part of the Columbus district is also situated in Alabama; data for this district are presented in the bulletin for Georgia.

Table 7 shows the population of the Birmingham metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. In 1940 the Birmingham metropolitan district had 407,851 inhabitants, whereas in 1930 the district as then constituted had a population of 382,792. All of precincts 22, 38, and 44, and that part of precinct 51 that was annexed to precinct 33 in 1940 were included in the metropolitan district in 1940 for the first time. That part of precinct 8 that was annexed to precinct 41 in 1939 was not included in the metropolitan district in 1940 although it was included in the district in 1930. Since the 1930 population of these parts of precincts 8 and 51 is not obtainable, the total population in 1930 cannot be given for either the new area or the area now omitted.

Table 7-A shows the population of the Mobile metropolitan district and its constituent political units in 1940. This district was defined for the first time in 1940. In 1940 the Mobile metropolitan district had 114,906 inhabitants. Comparative figures for 1930 are not available because of the redistricting¹⁵ of Mobile County into new minor civil divisions.

For comparison the 1930 population of the units comprising the present district is also shown, together with the increase between 1930 and 1940. In 1940 the Montgomery metropolitan district had 93,697 inhabitants, whereas in 1930 the same area had a population of 78,389.

Census tracts.—Census tracts are small areas into which certain large cities are subdivided for statistical and local administrative purposes, through cooperation with a local committee in each case. The tracts are permanently established, so that comparisons may be

In table 8 the 1940 population of Birmingham is shown by census tracts. Since these tracts were not established until after 1930, there are no comparative figures for earlier censuses. The census tracts for Birmingham are shown on the accompanying map.

MINOR CIVIL DIVISIONS—SUPERVISORIAL DISTRICTS

ARIZONA

NUMBER OF INHABITANTS

Population of the State.—Arizona was organized as a Territory in 1863 and was admitted to the Union as the forty-eighth State in 1912. Its population on April 1, 1940, according to the Sixteenth Census, was 499,261, which represents an increase of 63,688, or 14.6 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 113,580 square miles. The average number of inhabitants per square mile in 1940 was 4.4, as compared with 3.8 in 1930.

Table 1 shows the population of Arizona from 1870, the year in which its area was first separately enumerated, to 1940, together with the increase during each

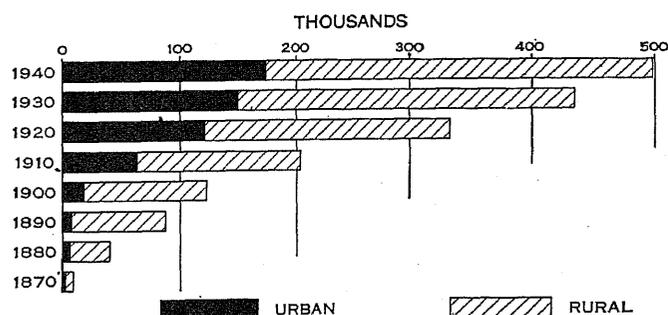

decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of Arizona comprises all persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more. Places are likewise taken off the urban list when, through decline in population, they fall below this limit. For example, Clifton qualified as urban in 1920 and 1940 but not in 1930.

URBAN AND RURAL POPULATION OF ARIZONA: 1870 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of Arizona is shown by counties, super-visorial districts, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards, and table 7 presents data for the Phoenix metropolitan district.

Cities of 10,000 or more.—There are two cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each

census for which figures are available, together with the increase or decrease during each decade. Phoenix, the capital and largest city, had a population in 1940 of 65,414.

Counties.—Table 3 shows the population of the 14 counties of Arizona from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census re-

ports. Nine of these counties increased in population between 1930 and 1940, and five decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Arizona are called supervisorial districts. The incorporated cities and towns form secondary subdivisions of the minor civil divisions in which they are located. There are 15 cities and 19 towns. Ordinarily, each of these secondary divisions forms a part of some district (or districts).

Table 4 shows the population of each county by districts, cities, and towns for the last three censuses. The population of the cities and towns is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more districts the total population of the place is given in connection with the presentation for the first district.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[The "districts" shown in the table are supervisory districts. Since figures for 1930 and 1920 were given for election precincts, justice precincts, or school districts, comparative figures can be shown for county totals and for secondary divisions only. For changes between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. I, pp. 93-97]

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. Only a portion of a minor civil division is included if the minor civil division has a large area and practically all of the population is concentrated in a small section near the central city with the more remote sections being very sparsely settled. In such cases, the unit considered was not the minor civil division but component enumeration districts. (For example, not all of the enumeration districts in supervisorial districts 1, 2, and 3 of Maricopa County are included in the Phoenix metropolitan district.) A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

The Phoenix metropolitan district is the only one in Arizona. This district was defined for the first time in 1940.

Table 7 shows the population of the Phoenix metropolitan district and its constituent political units in 1940. In 1940 the Phoenix metropolitan district had 121,828 inhabitants. Comparative figures for 1930 are not available because of the redistricting of the counties into new minor civil divisions.

NUMBER OF INHABITANTS

Population of the State.—Arkansas was admitted to the Union as the twenty-fifth State in 1836 with boundaries substantially as at present. It was organized as a Territory in 1819, including then most of the present area of Oklahoma. Its population on April 1, 1940, according to the Sixteenth Census, was 1,949,387, which represents an increase of 94,905, or 5.1 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 52,725 square miles. The average number of inhabitants per square mile in 1940 was 37.0, as compared with 35.2 in 1930.

Table 1 shows the population of Arkansas from 1810, the year in which the area was first separately enu-

merated, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of Arkansas consists of all persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more. Places are likewise taken off the urban list when, through decline in population, they fall below this limit. For example, Clarendon qualified as urban in 1920 and 1940 but not in 1930.

URBAN AND RURAL POPULATION OF ARKANSAS: 1810 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of Arkansas is shown by counties, townships, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards, and table 7 presents data for the Little Rock metropolitan district.

Cities of 10,000 or more.—There are nine cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Little Rock, the capital and largest city, had a population in 1940 of 88,039.

Counties.—Table 3 shows the population of the 75 counties of Arkansas from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. Of the 73 counties whose boundaries remained unchanged since 1930, 47 increased in population between 1930 and 1940, and 26 decreased. Part of Desha County was annexed to Chicot County in 1931. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Arkansas are the townships. The incorporated cities and towns form secondary subdivisions of the minor civil divisions in which they are located. There are 76 cities and 336 towns. Ordinarily, each of these secondary divisions, or incorporated places, forms a part of some township (or townships).

Table 4 shows the population of each county by townships, cities, and towns for the last three censuses. The population of the cities and towns is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more townships in the same county, the total population of the place is given in connection with the presentation for the first township. Where the place is situated in two or more counties, the total population is given in connection with each county.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 7 shows the population of the Little Rock metropolitan district and its constituent political units in 1940 and 1930, together with the increase during the decade. In 1940 the Little Rock metropolitan district had 126,724 inhabitants, whereas in 1930 the district had a population of 113,137. The metropolitan district in 1940 consisted of exactly the same political units as in 1930.

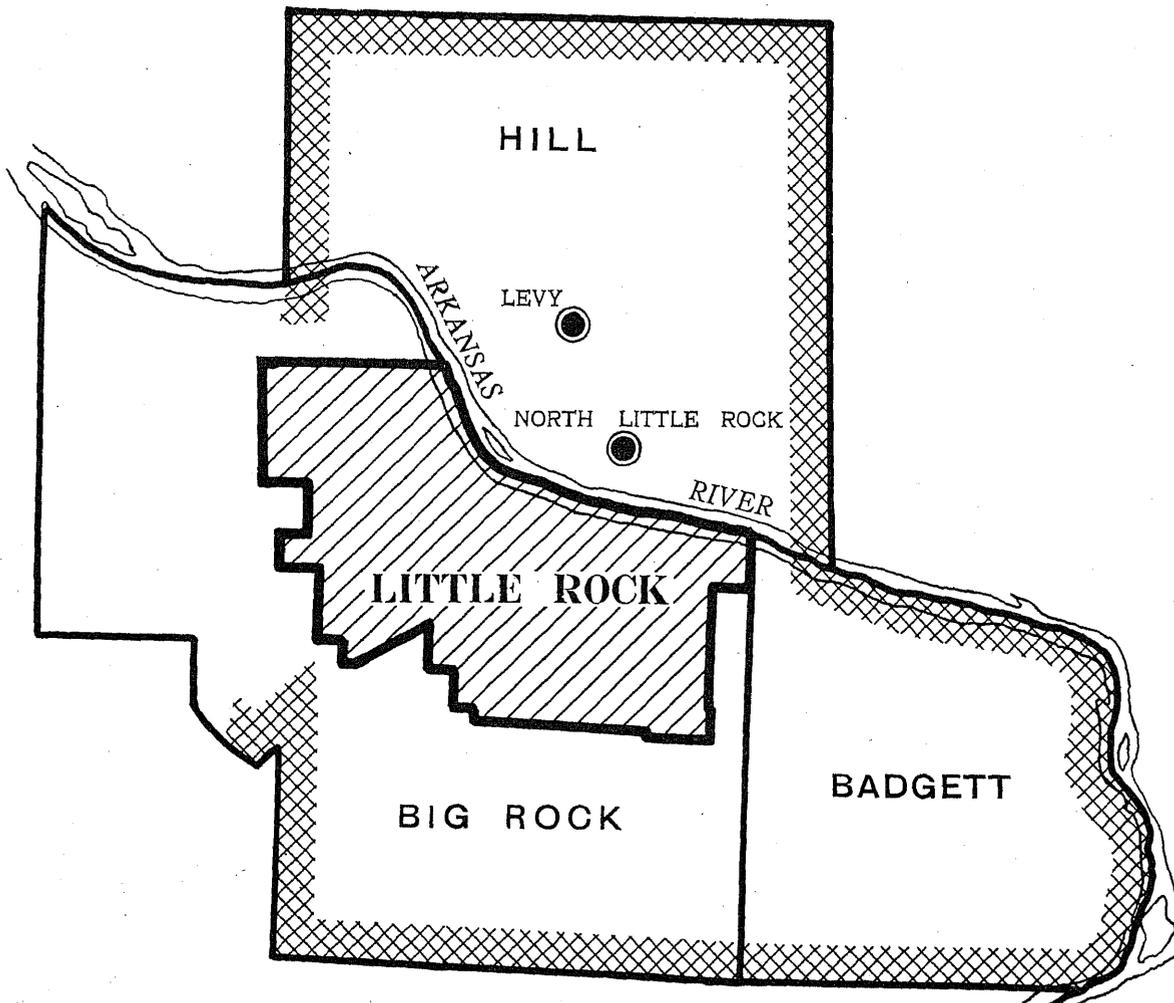

Part of the Memphis metropolitan district is situated in Arkansas. Data for this metropolitan district are presented in the bulletin for Tennessee.

CALIFORNIA

NUMBER OF INHABITANTS

Population of the State.—California was organized as a State from a part of the area acquired from Mexico in 1848, and was admitted to the Union as the thirty-first State in 1850, with boundaries as at present. Its population on April 1, 1940, according to the Sixteenth Census, was 6,907,387, which represents an increase of 1,230,136, or 21.7 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 156,803 square miles. The average number of inhabitants per square mile in 1940 was 44.1, as compared with 36.2 in 1930.

Table 1 shows the population of California from 1850, the year in which its area was first enumerated, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban

population of California, as defined by the Census Bureau, consists mainly of those persons living in incorporated places of 2,500 or more. It also includes the population of one township (not incorporated as a municipality nor containing any areas so incorporated)¹ that had a total population of more than 10,000 and a population density of more than 1,000 per square mile. The remainder of the population is classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they meet the requirements. Places are likewise taken off the urban list when, through decline in population, they no longer meet the requirements. For example, Benicia qualified as urban in 1920 and 1930, but not in 1910 or 1940.

URBAN AND RURAL POPULATION OF CALIFORNIA: 1850 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of California is shown by counties, judicial

townships, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards or assembly districts. Data for the metropolitan districts are presented in tables 7 to 7-F and for the census tracts of the tracted cities and adjacent areas in tables 8, 8-A, and 8-B.

Cities of 10,000 or more.—There are 59 cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Los Angeles, the largest city, had a population in 1940 of 1,504,277; and Sacramento, the capital of the State, had a population of 105,958.

¹ Not returned separately.

² Returns for San Francisco for 1850 destroyed by fire; population in 1852, according to State census of that year, 34,776.

³ Figures for 1900 to 1930 corrected since publication of vol. I, 1930, by the addition of the population (879 in 1900; 1,276 in 1910; 4,262 in 1920; 1,596 in 1930) of Mare Island Naval Reservation.

Counties.—Table 3 shows the population of the 58 counties of California from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census

reports. Fifty-six of these counties increased in population between 1930 and 1940, and two decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

1 1930 urban and rural figures for State total and Solano County do not take account of correction made in the population of Vallejo city for this date; see explanatory note on Solano County, table 4.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in California are called judicial townships. San Francisco is in a class by itself, being incorporated as the "City and County of San Francisco." The incorporated cities (except San Francisco) and towns form secondary subdivisions of the minor civil divisions in which they are located. There are 235 cities (including San Francisco) and 50 towns. Ordinarily, each of the

secondary divisions forms a part of some judicial township (or townships).

Table 4 shows the population of each county by judicial townships, cities, and towns for the last three censuses. The population of the cities and towns is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more judicial townships, the total population of the place is given in connection with the presentation for the first township.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[The "townships" shown in the table are judicial townships. Where no comparative figures for townships are shown, the counties have been redistricted at some time between censuses. For changes in boundaries, etc., between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. I, pp. 132-140]

³³ SHASTA.—Township 9 organized from part of 4 in 1930.

³⁴ SIERRA.—County total for 1920 includes population (53) of Plum Valley township, annexed to Forest in 1922. Part of Loyalton town reverted to Loyalton township in 1936.

³⁵ SISKIYOU.—Tule Lake township organized from part of Lake in 1929, but not returned separately in 1930. Tulelake city incorporated in 1937. Dunsmuir town incorporated as a city in 1935.

³⁶ SOLANO.—Part of Vacaville township annexed to Vacaville town in 1939, and part of Vallejo township annexed to Vallejo city in 1936. The figures for 1930 and 1920 for Vallejo city have been corrected to include population (1,596 in 1930; 4,262 in 1920) of Mare Island Naval Reservation, erroneously returned as in Vallejo township, outside Vallejo city, in those years. No change has been made in the urban figures because of the correction in the population of Vallejo city, as here indicated. Fairfield town incorporated as a city in 1938.

³⁷ SONOMA.—County redistricted in 1933, 1934, and 1935; comparative figures shown wherever possible.

³⁸ STANISLAUS.—Parts of Modesto township annexed to Modesto city in 1934, 1938, and 1939. Part of Waterford township annexed to Riverbank township in 1939.

³⁹ TEHAMA.—County redistricted in 1935; comparative figures shown wherever possible.

⁴⁰ TULARE.—County totals for 1930 and 1920 include population (85 in 1930; 156 in 1920) of Allensworth township, and population (269 in 1930; 317 in 1920) of a Angiola township, annexed to Alpaugh in 1930, but returned separately in 1939; and population (665 in 1930; 608 in 1920) of Springville township, annexed to Forterville township in 1927, but returned separately in 1930. Total for 1920 also includes population (164) of Tule River Indian Reservation, returned independently in 1920. Parts of Strathmore and Tipton townships annexed to Porterville township in 1937. Woodlake city incorporated in 1939.

⁴¹ TUOLUMNE.—County redistricted in 1939; comparative figures shown wherever possible.

⁴² VENTURA.—County redistricted in 1934; comparative figures shown wherever possible.

⁴³ YOLO.—Parts of Capay and Cottonwood townships annexed to Esparto in 1930; part of Woodland township annexed to Woodland city in 1934.

Incorporated and urban places.—Table 5 shows the population in 1940 and 1930 of the incorporated places (cities and towns) and of the one urban township in California. In this table the places are arranged in

alphabetical order, each followed by the name of the county in which it is located. In table 6 the population of the cities of 5,000 or more that are subdivided into wards is shown by wards.

TABLE 5.—POPULATION OF INCORPORATED AND URBAN PLACES: 1940 AND 1930

(The population of these places in 1920 is given in table 4. Places marked with an asterisk (*) were classified as urban in 1940; Belvedere township, which has two asterisks (**), was classified as urban under special rule)

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions or incorporated places having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. Only a portion of a minor civil division is included if the minor civil division has a large area and the principal concentration of population is in a small section near the central city with the more remote sections being sparsely settled. In such cases, the

unit considered is not the minor civil division but component enumeration districts. (For example, not all of the enumeration districts in National township of San Diego County are included in the San Diego metropolitan district.) A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 7 shows the population of the Fresno metropolitan district and its constituent political units in 1940. This district was defined for the first time in 1940. For comparison the 1930 population of the units comprising the present district is also shown, together

with the increase between 1930 and 1940. In 1940 the Fresno metropolitan district had 97,504 inhabitants, while in 1930 the same area had a population of 78,118.

TABLE 7.—POPULATION OF THE FRESNO METROPOLITAN DISTRICT: 1940 AND 1930

[This area was not defined as a metropolitan district in 1930; the figures shown in the second column represent the 1930 population of the specified places as defined in 1930]

Table 7-A shows the population of the Los Angeles metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. In 1940 the Los Angeles metropolitan district had 2,904,596 inhabitants, while in 1930 the district as then constituted had a population of 2,318,526. Catalina township, in Los Angeles County, which was in the metropolitan district in 1930, was not included in the metropolitan district in 1940. The redistricting of Los Angeles County between 1930 and 1940 necessitated an additional redefinition of the boundaries of the metropolitan district, resulting in a slight increase in the area included in the district. The net effect of these changes was to alter the area of the metropolitan district only slightly; the net effect upon the population increase in the district is not ascertainable.

¹ Catalina township, Los Angeles County (population 1,933 in 1940 and 1,936 in 1930), was in the metropolitan district in 1930, but is not included in the district as defined in 1940. Redistricting of Los Angeles County in 1931, 1932, 1935, and 1939 necessitated a redefinition of boundaries of the metropolitan district, resulting in a slight increase in the area included in the district. (Comparative figures for the judicial townships in Los Angeles County shown wherever possible.) Boundaries of that part of Orange township (Orange Co.) included in the metropolitan district slightly changed since 1930 to conform with selected 1940 census enumeration districts, but area included in 1940 and 1930 is approximately the same. The net effect of these 3 changes was to change the area of the metropolitan district only slightly; the net effect upon the population increase in the district is not ascertainable.

² Tujunga city, formerly in La Crescenta township (Los Angeles Co.), annexed to Los Angeles city (coextensive with Los Angeles township) in 1932.

Table 7-C shows the population of the San Diego metropolitan district and its constituent political units in 1940 and some comparative figures for 1930, together with the increase during the decade. In 1940 the San Diego metropolitan district had 256,368 inhabitants, while in 1930 the district as then constituted had a population of 181,020. The redistricting of San Diego County between 1930 and 1940 necessitated a redefinition of the boundaries of the metropolitan district, resulting in a slight net increase in the area included in the district; the effect upon the population increase in the district is not ascertainable.

Table 7-D shows the population of the San Francisco-Oakland metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. In 1940 the San Francisco-Oakland metropolitan district had 1,428,525 inhabitants, while in 1930 the district as then constituted had a population of 1,290,094. Townships 6, 8, and 16, and part of township 5, all in Contra Costa County, were included in the metropolitan district in 1940 for the first time. Bolinas township, Marin County, which was not included in the district in 1930, was annexed to Sausalito township and is now included; similarly, part of Fremont township, Santa Clara County, not previously included, was annexed to Palo Alto township between 1930 and 1940. The redistricting of San Mateo County necessitated an additional redefinition of the boundaries of the metropolitan district, resulting in a slight increase in the

area included in the district. Finally, the part of Washington township, Alameda County, included in the metropolitan district was increased between 1930 and 1940. The combined effect of all these changes was to increase the area of the metropolitan district considerably, but the effect upon the population increase in the district is not ascertainable.

¹ Total population in the 1930 metropolitan district includes 72,836 in San Mateo County, which was redistricted in 1932. This redistricting necessitated a redefinition of metropolitan district boundaries, resulting in a slight increase in the area included in the district; the effect upon the population increase in the district is not ascertainable. (Boundaries of that part of township 3, San Mateo Co., included in the district, changed slightly since 1930 to conform with selected 1940 census enumeration districts, but area included in 1940 and 1930 is approximately the same.) The abolition of voting precincts in Washington township (Alameda Co.) necessitated an approximation to the part of the township included in the metropolitan district, the net result being another extension of area of the metropolitan district; effect upon the population increase in the district again not ascertainable. Bolinas township (Marin Co.), not included in the metropolitan district in 1930, was annexed to Sausalito township in 1937; the 1930 population of the new inclusion in the district was 478, the 1940 population not obtainable separately. Part of Fremont township (1940 and 1930 population not obtainable), which was outside the district in 1930, annexed to Palo Alto township (Santa Clara Co.) in 1931, and is included in the district in 1940. Finally, townships 6, 8, and 16 (1930 population 10,692, 4,886, and 1,570, respectively) and part of township 5 (1930 population not obtainable), all in Contra Costa County, were included in the metropolitan district in 1940 for the first time. The combined effect of all these changes was to increase the area of the metropolitan district considerably, but the effect upon the population increase in the district is not ascertainable.

⁵ Increase shown is due mainly to extension of territory included in the metropolitan district.

⁶ That part outside San Jose city is bounded by State Highway 5, Capital Ave., Penitencia Road, Toyon Ave., State Highway 115, Clayton Road, Story Road, White Road, Aborn Road, Loup Ave., Singleton Road, Senter Road, U. S. Highway 101, township line, McKean Road, Harry Road, Almaden Road, Kooser Road, and Blossom Hill Road.

Table 7-F shows the population of the Stockton metropolitan district and its constituent political units in 1940. This district was defined for the first time in

1940. For comparison the 1930 population of the units comprising the present district is also shown, together with the increase between 1930 and 1940. In 1940 the Stockton metropolitan district had 79,337 inhabitants, while in 1930 the same area had a population of 61,880.

TABLE 7-F.—POPULATION OF THE STOCKTON METROPOLITAN DISTRICT: 1940 AND 1930

[This area was not defined as a metropolitan district in 1930; the figures shown in the second column represent the 1930 population of the specified places as defined in 1930]

Census tracts.—Census tracts are small areas into which certain large cities (and sometimes their adjacent areas) have been subdivided for statistical and local administrative purposes, through cooperation with a local committee in each case. Through the use of census tract data, comparisons may be made from census to census. Tracts are laid out with a view to approximate uniformity in population and with some regard for uniformity in area, and each is designed to include an area fairly homogeneous in population characteristics. In table 8 the 1940 population of Los Angeles, Long Beach, and adjacent areas is shown by census tracts. Comparative figures for 1930 are not shown because of extensive revision of tract boundaries since 1930. The tracted area adjacent to Los Angeles and Long Beach comprises the remainder of Los Angeles County. In table 8-A the 1940 population of Oakland, Berkeley, and adjacent areas is shown by census tracts. Since the tracts for Oakland and the adjacent areas were not established until after 1930, there are no comparative figures for earlier censuses. In 1930 there were six tracts (health districts) in Berkeley. The 26 tracts in 1940 represent subdivisions of the original 6, as explained in the footnote on table 8-A. In table 8-B the 1940 population of San Francisco is shown by census tracts. Since these tracts were not established until after 1930, there are no comparative figures for earlier censuses. All the tracted areas are shown on the accompanying maps.

1 In 1930 there were 6 tracts (health districts) in Berkeley. The 26 tracts in 1940 represent subdivisions of the original 6, as the letters following the tract numbers indicate. The 1930 population of the 6 tracts was as follows: Tract 1, 5,914; tract 2, 10,794; tract 3, 18,656; tract 4, 17,650; tract 5, 16,617; and tract 6, 12,478.

COLORADO

NUMBER OF INHABITANTS

Population of the State.—Colorado was organized as a Territory in 1861 from parts of the Kansas, Nebraska, New Mexico, and Utah Territories. In 1876, without change in boundaries and with boundaries as at present, it was admitted to the Union as the thirty-eighth State. Its population on April 1, 1940, according to the Sixteenth Census, was 1,123,296, which represents an increase of 87,505, or 8.4 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 103,967 square miles. The average number of inhabitants per square mile in 1940 was 10.8, as compared with 10.0 in 1930.

Table 1 shows the population of Colorado from 1860, the year in which the area now included in the State

was first separately enumerated, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table, and is also shown graphically in the accompanying chart. The urban population of Colorado consists of those persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more. Places are likewise taken off the urban list when, through decline in population, they fall below this limit. For example, Florence qualified as urban in 1920 and 1940 but not in 1930.

URBAN AND RURAL POPULATION OF COLORADO: 1860 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of Colorado is shown by counties, election precincts, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards. Data for the Denver and Pueblo metropolitan districts are presented in tables 7 and 7-A and for the census tracts of Denver in table 8.

Cities of 10,000 or more.—There are eight cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Denver, the capital and largest city, had a population in 1940 of 322,412.

¹ Colorado City and Colorado Springs city consolidated between 1910 and 1920; combined population, 33,411 in 1910; 23,999 in 1900; 12,923 in 1890; 4,573 in 1880.

² Corrected figure; exclusive of population (2,648) of certain territory outside the city limits.

Counties.—Table 3 shows the population of the 63 counties of Colorado from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census

reports. Thirty-nine of these counties increased in population between 1930 and 1940, and twenty-four decreased. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Colorado are the election precincts and some of the cities. (The Consolidated Ute Indian Reservation, in Montezuma County, is also classified as a primary division.) There are 41 cities and 206 towns, of which 5 cities are independent of election precinct organization and form primary divisions of the counties. In addition, Denver is in a class by itself, being incorporated as the "City and County of Denver." The remaining cities and the towns, each of which is a part of one or more precincts, form secondary subdivisions of the minor civil divisions in which they are located.

Table 4 shows the population of each county by election precincts, cities, and towns for the last three censuses. The population of the cities and towns that constitute secondary divisions is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more precincts in the same county, the total population of the place is given in connection with the presentation for the first precinct. Where the place is situated in two or more counties, the total population is given in connection with each county. The population of the cities that comprise several entire precincts is shown in roman type, followed by the precinct population in *italic* type.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[The "precincts" shown in the table are election precincts. Counties showing totals but few comparative figures for election precincts for 1930 or 1920 have been redistricted at some time between censuses. For changes in boundaries, etc., between 1930 and 1940, see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. 1, pp. 153-165]

⁵³ SAN MIGUEL.—For footnote, see preceding page.
⁵⁴ SUMMIT.—County total for 1930 includes population (58) of precinct 9, Tiger, annexed to 1 in 1936. Parts of precincts 4 and 7 annexed to 1, and part of precinct 4 annexed to 7, in 1933.
⁵⁵ TELLER.—County total for 1930 includes population (111) of precinct 10, including part of Goldfield city, annexed to 9 in 1930. Part of precinct 5 annexed to 7, parts of precinct 7 annexed to 5 and 9, and part of 7, including part of Victor city, annexed to 8, in 1940. Green Mountain Falls town, geographically located in El Paso and Teller Counties, had no population in 1940 for that part in Teller County; returned in 1930 and 1920 as in El Paso County only. Name of precinct 9 returned in 1930 as Cunningham Addition.
⁵⁶ WASHINGTON.—County redistricted in 1934; comparative figures shown wherever possible.
⁵⁷ WELD.—County totals for 1930 and 1920 include population (461 in 1930; 458 in 1920) of old precinct 39, East Evans, including part of Evans town, annexed to 5 in 1932; population (108 in 1930; 147 in 1920) of old precinct 62, Riverside, parts annexed to 23 and 51 in 1935. Total for 1920 also includes population (442) of old precinct 19, Barnesville, parts annexed to 4 and 35, and population (633) of old precinct 41, Columbine, annexed to 14, in 1924. Part of precinct 1 annexed to Fort Lupton town, part of precinct 30 to 59, part of precinct 60 to 44, in 1930; part of precinct 61 to 44 since 1930; part of precinct 8 to Erie town, parts of precinct 36 to 17, 44, and 60, in 1932; part of precinct 27 to 58, and part of precinct 35 to Ault town, in 1936; part of precinct 4 to Windsor town in 1938, and parts of precinct 16 to Greeley city in 1938 and 1939. Precinct 39 organized from parts of 30, 58, and 59 in 1932, and precinct 62 from part of 48, including part of Johnstown town, in 1938. Name of precinct 16, Franklin, changed from Gipson in 1934, and precinct 18, Gill, from Crow Creek in 1930. Garden City town incorporated in 1936. Raymer town returned in 1930 as New Raymer. Severance town not returned separately in 1930 and 1920.

Incorporated places.—Table 5 shows the population in 1940 and 1930 of the incorporated places (cities and towns) in Colorado. In this table the places are arranged in alphabetical order, each followed by the

name of the county in which it is located. In table 6 the population of the cities of 5,000 or more that are subdivided into wards is shown by wards.

NOTE.—Other cities of more than 5,000 (Colorado Springs, Denver, and Pueblo) have no wards.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions or incorporated places having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. Only a portion of a minor civil division is included if the minor civil division has a large area and practically all of the population is concentrated in a small section in or near the central city with the more remote sections being very sparsely settled. In such cases, the unit considered is not the minor civil division but component enumeration districts. (For example, not all of the enumeration districts in precincts 1, 9, 14, 34, and 35, of Pueblo County are included in the Pueblo metropolitan district.) A

metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 7 shows the population of the Denver metropolitan district and its constituent political units in 1940 and some comparative figures for 1930, together with the increase or decrease during the decade. In 1940 the Denver metropolitan district had 384,372 inhabitants, whereas in 1930 the district as then constituted had a population of 330,761. Precinct 28, Baker, in Adams County, was included in the metropolitan district in 1940 for the first time. The re-districting of Arapahoe County also resulted in a net increase in the part included in the metropolitan district. The increase in the population of the metropolitan district attributable to the total change in area included is thus not obtainable.

Table 7-A shows the population of the Pueblo metropolitan district and its constituent political units in 1940, when it was defined for the first time. In 1940 the Pueblo metropolitan district had 62,039 inhabitants. Comparative figures for 1930 are not available because of the redistricting of the county into new minor civil divisions.

² That part of precinct 9 in the metropolitan district, but outside Pueblo city, comprises that part of Colorado State Hospital for the Insane in precinct 9 (no population).

Census tracts.—Census tracts are small areas into which certain large cities are subdivided, for statistical and local administrative purposes, through cooperation with a local committee in each case. The tracts are permanently established, so that comparisons may be made from census to census; they are laid out with a view to approximate uniformity in population and with some regard for uniformity in area; and each is designed to include an area fairly homogeneous in population characteristics. In table 8 the 1940 population of Denver is shown by census tracts. Since these tracts were not established until after 1930, there are no comparative figures for earlier censuses. The census tracts for Denver are shown on the accompanying map.

CONNECTICUT MINOR CIVIL DIVISIONS—TOWNS, CITIES, AND BOROUGHS

CONNECTICUT

NUMBER OF INHABITANTS

Population of the State.—Connecticut was one of the Thirteen Original States. Its population on April 1, 1940, according to the Sixteenth Census, was 1,709,242, which represents an increase of 102,339, or 6.4 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 4,899 square miles. The average number of inhabitants per square mile in 1940 was 348.9, as compared with 328.0 in 1930.

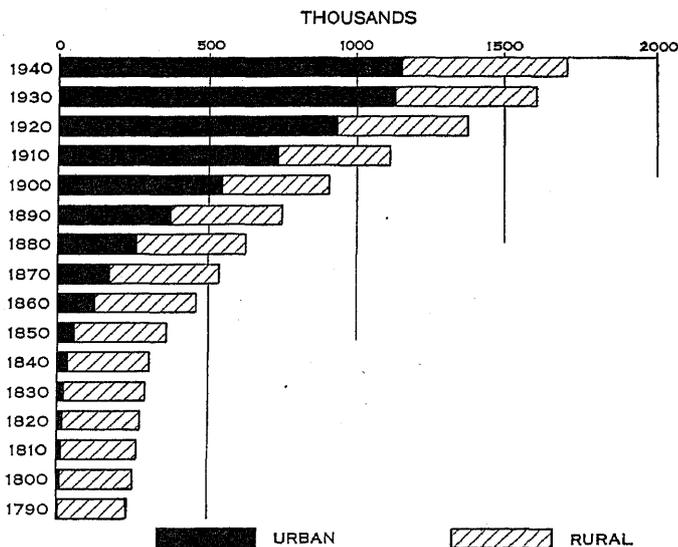

Table 1 shows the population of Connecticut from 1790, the year of the first Federal census, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically

in the accompanying chart. The urban population of Connecticut, as defined by the Census Bureau, consists mainly of those persons living in incorporated places of 2,500 or more. It also includes the population of four towns (not incorporated as municipalities nor containing any areas so incorporated) that had a total population of 10,000 or more and a population density of 1,000 or more per square mile. The remainder of the population is classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they meet the requirements. Places are likewise taken off the urban list when, through decline in population, they no longer meet the requirements.

URBAN AND RURAL POPULATION OF CONNECTICUT: 1790 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of Connecticut is shown by counties, towns, cities, and boroughs, with some comparative figures from previous censuses. Table 6 gives the population of incorporated places by wards. Data for the metropolitan districts are presented in tables 7 to 7-C and for the census tracts of Hartford and its adjacent areas, and of New Haven in tables 8 and 8-A, respectively.

Incorporated places of 10,000 or more.—There are 20 incorporated places in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these incorporated places at each census for which figures are available, together with the increase or decrease during each decade. Hartford, the capital and largest city, had a population in 1940 of 166,267.

Counties.—Table 3 shows the population of the eight counties of Connecticut from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier

census reports. All eight of these counties increased in population between 1930 and 1940. No new counties have been organized, and there have been no changes in county boundaries since the census of 1930. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Connecticut are the towns. The incorporated cities and boroughs in some cases form secondary subdivisions of the minor civil divisions in which they are located and in other cases are coextensive with them. There are 21 cities

and 17 boroughs. Ordinarily, each of these secondary divisions forms a part of some town. Fourteen cities and one borough are coextensive with the towns in which they are located.

Table 4 shows the population of each county by towns, cities, and boroughs for the last three censuses. The population of the cities and boroughs is shown in *italics* under the population of the primary divisions in which the places are respectively located.

NOTE.—Other places of more than 5,000 (Bristol, Middletown, Norwich, Stamford, Torrington, and Winsted cities, and Southington and Wallingford boroughs) have no wards.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests. The following tables give data for the four metropolitan districts with central cities in Connecticut. Parts of the New York-Northeastern New Jersey and Springfield-Holyoke metropolitan districts are also situated in Connecticut; data for these districts are presented in the bulletins for New York and Massachusetts, respectively.

Table 7 shows the population of the Bridgeport metropolitan district and its constituent political units in 1940 and 1930, together with the increase during the decade. In 1940 the Bridgeport metropolitan district had 216,621 inhabitants, whereas in 1930 the district had a population of 203,969. The metropolitan district in 1940 had exactly the same area as in 1930.

Census tracts.—Census tracts are small areas into which certain large cities and sometimes their adjacent areas are subdivided for statistical and local administrative purposes, through cooperation with a local committee in each case. Through the use of census tract data comparisons may be made from census to census. Tracts are laid out with a view to approximate uniformity in population and with some regard for uniformity in area, and each is designed to include an area fairly homogeneous in population characteristics. In table 8 the 1940 population of Hartford and some adjacent areas in Hartford County is shown by census tracts. Since these tracts were not established until after 1930, there are no comparative figures for earlier censuses. In table 8-A the 1940 and 1930 population of New Haven is shown by census tracts. The tracted areas are shown on the accompanying maps.

Population of the State.—Delaware was one of the Thirteen Original States. Its population on April 1, 1940, according to the Sixteenth Census, was 266,505, which represents an increase of 28,125, or 11.8 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 1,978 square miles. The average number of inhabitants per square mile in 1940 was 134.7, as compared with 120.5 in 1930.

Table 1 shows the population of Delaware from 1790, the year of the first Federal census, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is also presented in this table and is shown graphically in the accompanying chart.

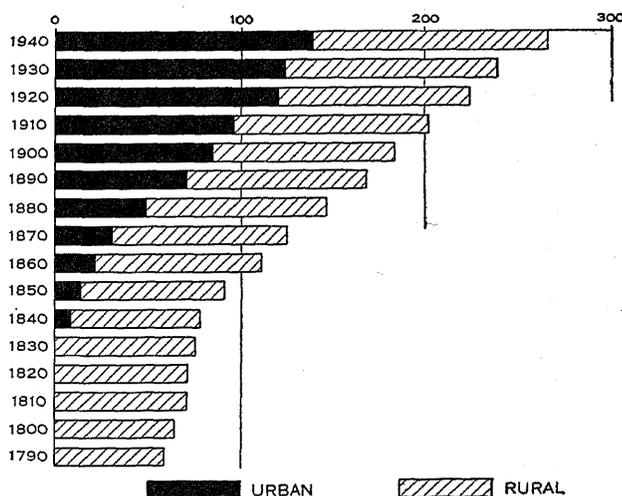

The urban population of Delaware consists of all persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural.

URBAN AND RURAL POPULATION OF DELAWARE: 1790 TO 1940
THOUSANDS

The urban and rural areas are not constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more; for example, Bellefonte was classified as urban in 1940 for the first time. Places are likewise taken off the urban list when, through decline in population, they fall below this limit.

Geographic subdivisions.—In the tables that follow (tables 2 to 5) the population of Delaware is shown by counties, representative districts, cities, and towns, with some comparative figures from previous censuses. Table 6 gives the population of the city of Wilmington by wards, and table 7 presents data for the Wilmington metropolitan district.

Cities of 10,000 or more.—Table 2 shows the population of Wilmington, the only city in Delaware with more than 10,000 inhabitants, from 1840, the first census

NUMBER OF INHABITANTS

subsequent to its incorporation, to 1940, together with the increase during each decade. Wilmington had a population in 1940 of 112,504.

Counties.—Table 3 shows the population of the three counties of Delaware from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier census reports. All three of these counties increased in population between 1930 and 1940. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary subdivisions of the counties in Delaware are called representative districts. The incorporated cities and towns form secondary subdivisions of the minor civil divisions in which they are located. There are 5 cities and 47 towns. Ordinarily, each of these secondary divisions, or incorporated places, forms a part of some representative district (or districts).

Table 4 shows the population of each county by

districts, cities, and towns for the last three censuses. The population of cities and towns is shown in *italics* under the population of the districts in which the places are respectively located. Where an incorporated place is located in two districts in the same county, the total population of the place is given in connection with the presentation for the first district. Where the place is situated in two counties, the total population is given in connection with each county. The population of Wilmington, which comprises several entire districts, is presented in roman type, followed by the district population in *italic* type.

² NEW CASTLE.—Parts of district 6 annexed to Wilmington city (district 2) in 1933. Newark town returned in 1930 and 1920 as in district 9 only.

³ SUSSEX.—Milford town incorporated as a city in 1932. Slaughter Beach town incorporated in 1931. Laurel town reported in 1930 as in district 5 only, with a population of 2,277. North Laurel town (population 265 in 1930; 182 in 1920) was annexed to Laurel in 1929, but information as to this annexation was not received until after the 1930 reports were completed. Laurel was therefore not classified as an urban place in the 1930 reports; and no change has been made in the 1930 urban figures because of the correction in the population of this town, as here indicated, to 2,542. For population of Delmar town in Maryland, see footnote on table 5.

Incorporated places.—Table 5 shows the population arranged in alphabetical order, each followed by the name of the county in which it is located. In table 6 the population of Wilmington is presented by wards.

NOTE.—Dover, the only other city of more than 5,000, has no wards.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts, a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

The Wilmington metropolitan district is the only one in Delaware. Like several other districts it occupies some territory in more than one State. New Garden township and Avondale borough, both in Chester County, Pennsylvania, were included in the Wilmington metropolitan district in 1940 for the first time.

Table 7 shows the population of the Wilmington metropolitan district and its constituent political units in 1940 and 1930, together with the increase during the decade. In 1940 the metropolitan district had 188,974 inhabitants, whereas in 1930 the district as then constituted had a population of 163,592. It may also be noted that the political units that made up the district in 1940 had a population of 166,746 in 1930.

DISTRICT OF COLUMBIA BY POLICE PRECINCTS

DISTRICT OF COLUMBIA

NUMBER OF INHABITANTS

Population of the District.—The District of Columbia, formed from territory ceded by Maryland and Virginia, was established as the seat of the Federal Government in accordance with acts of Congress passed in 1790 and 1791. In 1791 the boundaries of the District were defined as including the present area, together with about 30 square miles on the Virginia side of the Potomac; Georgetown and Alexandria were thus both included. The city of Washington was incorporated in 1802. In 1846 the area south of the Potomac (including Alexandria) was retroceded to Virginia, leaving the District of Columbia with its present limits. The city of Washington has been coextensive with the District of Columbia since 1895.

The population of the District of Columbia on April 1, 1940, according to the Sixteenth Census, was 663,091, which represents an increase of 176,222, or 36.2 percent,

as compared with the population on April 1, 1930. The total land area of the District is 61 square miles. The average number of inhabitants per square mile in 1940 was 10,870.3, as compared with 7,981.5 in 1930.

Table 1 shows the population of the District of Columbia from 1800, the year in which its area was first separately enumerated, to 1940, together with the increase during each decade. The figures for the censuses prior to 1850 include the population of the area south of the Potomac, which was retroceded to Virginia in 1846. The urban and rural population of the District at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population consists of those persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The District has been entirely urban since 1890.

URBAN AND RURAL POPULATION OF THE DISTRICT OF COLUMBIA: 1800 TO 1940

Subdivisions.—Tables 2 and 4 present data, respectively, for the city of Washington and the Washington metropolitan district; and tables 3 and 5 present data for the District of Columbia by police precincts and census tracts, respectively.

Population of Washington.—Table 2 shows the population of the city of Washington from 1800 to 1940, together with the increase during each decade. The figures for the censuses prior to 1900 are for the city before it became coextensive with the District.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 4 shows the population of the Washington metropolitan district and its constituent political units in 1940 and 1930, together with the increase or decrease during the decade. Since all of the metropolitan district outside the city of Washington is in Maryland or Virginia, a map of the metropolitan district is presented herewith. In 1940 the Washington metropolitan district had 907,816 inhabitants, while in 1930 the district as then constituted had a population of 621,059. District 10, Laurel, in Prince Georges County, Maryland, and that part of Falls Church district, Fairfax County, Virginia, outside Falls Church town, were included in the metropolitan district in 1940 for the first time. The population of this new area was 9,089 in 1940 and 5,999 in 1930.

¹⁰ Glen Arden town incorporated in 1939, but not returned separately in 1940.

¹¹ Arlington, Jefferson, and Washington magisterial districts (population for 1930: 17,845, 3,104, and 5,666, respectively), abolished in 1932.

¹² Only that part comprising part of Falls Church town in Falls Church district was included in the metropolitan district in 1930; the population of that part outside Falls Church town was 5,398 in 1940 and 2,848 in 1930; increase shown is due mainly to extension of territory included in metropolitan district.

Census tracts.—Census tracts are small areas into which certain large cities have been subdivided for statistical and local administrative purposes, through cooperation with a local committee in each case. Through the use of census tract data comparisons may be made from census to census. Tracts are laid out with a view to approximate uniformity in population and with some regard for uniformity in area, and each is designed to include an area fairly homogeneous in population characteristics. In table 5 the 1940 and 1930 population of the District of Columbia is shown by census tracts. The census tract boundaries were radically changed in 1935, but a special tabulation of the 1930 data was made for the new tracts, from which are taken the 1930 figures in table 5. These tracts are shown on the accompanying map.

NUMBER OF INHABITANTS

Population of the State.—Florida was organized as a Territory in 1822, with boundaries as at present, from area purchased from Spain in 1819 and transferred to the United States in 1821. It was admitted to the Union in 1845 as the twenty-seventh State. The population of Florida on April 1, 1940, according to the Sixteenth Census, was 1,897,414, which represents an increase of 429,203, or 29.2 percent, as compared with the population on April 1, 1930. The total land area of the State, as shown in table 3, is 54,262 square miles. The average number of inhabitants per square mile in 1940 was 35.0, as compared with 27.1 in 1930.

Table 1 shows the population of Florida from 1830, the year in which the Territory of Florida was first

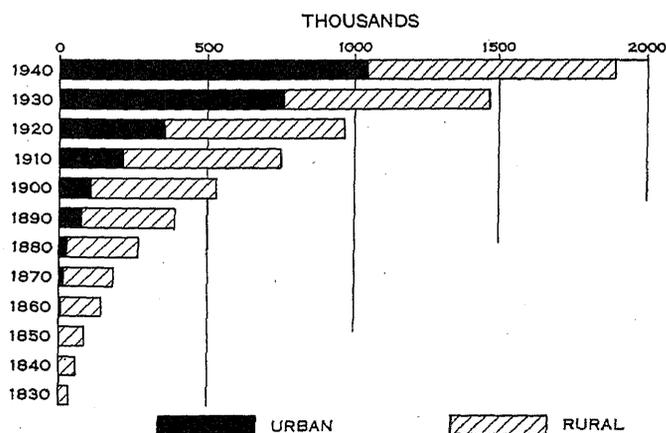

enumerated, to 1940, together with the increase during each decade. The urban and rural population of the State at each census is presented in this table and is also shown graphically in the accompanying chart. The urban population of Florida consists of those persons living in incorporated places of 2,500 or more, the remainder of the population being classified as rural. The urban and rural areas are not necessarily constant from one census to the next, since new places are added to the urban list from time to time as they attain a population of 2,500 or more; for example, Auburndale was classified as urban in 1940 for the first time. Places are likewise taken off the urban list when, through decline in population, they fall below this limit.

URBAN AND RURAL POPULATION OF FLORIDA: 1830 TO 1940

Geographic subdivisions.—In tables 2 to 5 the population of Florida is shown by counties, election precincts, cities, towns, and villages, with some comparative figures from previous censuses. Table 6 gives the population of cities by wards. Data for the metropolitan districts are presented in tables 7, 7-A, and 7-B.

Cities of 10,000 or more.—There are 20 cities in the State that had a population of 10,000 or more in 1940. Table 2 shows the population of these cities at each census for which figures are available, together with the increase or decrease during each decade. Jacksonville, the largest city, had a population in 1940 of 173,065; and Tallahassee, the capital of the State, had a population of 16,240.

¹ Daytona Beach, Daytona, and Seabreeze cities consolidated as Daytona Beach city in 1925. Combined population for 1920 and 1910 is as follows: 1920, 6,841; 1910, 3,721.² Returned as Myers in 1900 and 1890.³ Corrected since publication of vol. I, 1930.⁴ Not returned separately.

Counties.—Table 3 shows the population of the 67 counties of Florida from 1920 to 1940, together with the land area of each county and its population per square mile in 1940. The land areas given here are the result of new measurements recently compiled and differ somewhat from those published in earlier

census reports. Of the 65 counties whose boundaries remained unchanged since 1930, 52 increased in population between 1930 and 1940, and 13 decreased. Part of Glades County was annexed to Hendry County in 1937. This table also presents the urban and rural population of each county for 1940 and 1930.

Minor civil divisions.—To the primary political divisions into which the counties are subdivided the Census Bureau applies the general term "minor civil divisions." The primary divisions of the counties in Florida are called election precincts. The incorporated cities, towns, and villages form secondary subdivisions of the minor civil divisions in which they are located. There are 125 cities, 145 towns, and 3 villages. Ordinarily, each of these secondary divisions forms a part of some election precinct (or precincts).

Table 4 shows the population of each county by election precincts, cities, towns, and villages for the

last three censuses. The population of the cities, towns, and villages is shown in *italics* under the population of the primary divisions in which the places are respectively located. Where an incorporated place is located in two or more election precincts in the same county, the total population of the place is given in connection with the presentation for the first precinct. Where the place is situated in two or more counties, the total population is given in connection with each county. The population of Jacksonville and Key West cities, which comprise several entire precincts, is shown in roman type, followed by the precinct population in italics.

TABLE 4.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920 TO 1940

[The "precincts" shown in the table are election precincts. Where few comparative figures are shown, the counties have been organized at some time between the censuses or have been redistricted. For other changes in boundaries, etc., see footnotes; for those between 1920 and 1930, see Reports of the Fifteenth Census (1930), vol. I, pp. 100-215]

¹ ALACHUA.—County total for 1920 includes population (3,730) of precincts 4, 5, 18, 21, and 23, taken, together with parts of precincts 6, 11, and 20, to form Gilchrist County in 1926. Precinct 4 organized from part of 27, precinct 5, from part of 7, and precinct 23, from part of 25, each including part of Gainesville city; and precinct 21 organized Colony, incorrectly returned as in precinct 7. The 1930 figures for precincts 7 and 27 have been corrected by transfer of population (500) of the Florida Farm City returned in 1930 as in precincts 1, 2, 3, and 22 only. Springfield town incorporated in 1935. No population reported in 1940 for that part of precinct 22 outside Panama City.

² BAY.—Precinct 25 organized from part of 20, and precinct 29 from parts of 3, 4, and 24, in 1936; precinct 30 organized from parts of 1, 3, 11, 24, and 29 in 1940. Panama City.

³ BRADFORD.—County total for 1920 includes population (5,333) of old precincts 2, 3, 4, 8, and 9, taken to form Union County, and population (3,090) of old precinct 6, taken to form 2 and 3, in 1921; remaining precincts renumbered. Lawley town incorporated as a city, and part reverted to precinct 1, in 1931.

⁴ BREVARD.—Cocoa city returned in 1930 as in precinct 21 only, and Melbourne city, as in precinct 6 only. Name of precinct 9, Lotus, changed from Banyan, and between 1920 and 1930, but returned separately in 1930.

⁵ BROWARD.—County partially redistricted in 1934; comparative figures shown wherever possible. Parts of Fort Lauderdale city returned in 1930 as in precinct 2, and parts of Hollywood city to precincts 9 and 10 in 1937. Part of Oakland Park city returned in 1930 as in precinct 2.

38 MARION.—Precinct 34 organized from part of 13 in 1932. Dunnellon town returned in 1930 and 1920 as in Marion County only.
 39 MARTIN.—Place for which 1920 population is shown was in Palm Beach County. County total for 1930 includes population (32) of old precinct 7, Tropical Farms, annexed to 6 in 1932, and population (1,040) of old precinct 8, parts taken to form new 7 and 8 in 1937. Part of precinct 1 annexed to Stuart city in 1931.
 40 MONROE.—County partially redistricted in 1932; comparative figures shown wherever possible.
 41 NASSAU.—County total for 1920 includes population (3,147) of Fernandina city, not returned by precincts in 1920; population (2,490) erroneously included in Fernandina city, and population (100) of precinct 4, annexed to 5 in 1920. The 1920 figures for precincts 1 and 2 are exclusive of parts of Fernandina city located therein.
 42 OKALOOSA.—County total for 1920 includes population (141) of old precinct 10, annexed to 17 in 1920. Name of precinct 21, Fort Walton, changed from Camp Walton in 1932. Valparaiso city returned in 1930 as in precinct 22 only. Niceville town incorporated in 1938.
 43 OKEECHOBEE.—County total for 1920 includes population (34) of part of Seminole Indian Reservation in this county, not returned by precincts.
 44 ORANGE.—County partially redistricted in 1930 and 1940; comparative figures shown wherever possible. Part of Lake Maitland town reverted to precinct 27 since 1930. The figures for 1930 and 1920 for Lake Maitland town have been corrected to include population (136 in 1930; 125 in 1920) of Eatonville town, annexed in 1909, but returned separately in those years. Parts of Orlando, Apopka, Ocoee, and Winter Park cities, and Oakland town detached since 1930.
 45 OSCEOLA.—County totals for 1930 and 1920 include population (370 in 1930; 57 in 1920) of old precinct 9, Lokosee, annexed to 6; population (172 in 1930; 367 in 1920) of precinct 5, Deer Park, and population (1,702 in 1930) of precinct 12, Holopaw, taken to form new 9, since 1930.

⁴⁵ PALM BEACH.—County total for 1930 includes population (11) of precinct 34, Gladeview, annexed to 33 in 1930. Precinct 42 organized from part of precinct 21, including Greenacres City town, and from precinct 23 in 1930. Changes in precincts within the area of West Palm Beach city are as follows: Part of precinct 15 annexed to 13, part of 31 annexed to 15, and parts of the city reverted to precincts 4, 17, 18, and 31, in 1933. Parts of Delray Beach city reverted to precincts 26 and 28, in 1931 and 1933, respectively. Palm Beach Harbor town returned in 1930 as in precinct 2 only, and precincts 20 and 22 as entirely within Lake Worth city. Boynton town returned in 1930 as Boynton Beach. Ocean Ridge town incorporated as Boynton Beach from part of Boynton town in 1931; name changed in 1937. Manalapan town incorporated in 1931; no population reported in 1940 for that part in precinct 25. Gulf Stream town not returned separately in 1930. The 1930 figures for precincts 21 and 32 have been corrected by transfer of population (329) of Greenacres City town, erroneously returned as in precinct 32. No population reported in 1940 for that part of precinct 20 outside Lake Worth city.

⁴⁶ PASCO.—Precinct 24 organized from part of 19, including part of Dade City, in 1934. St. Leo town returned in 1930 as in precinct 10 only. Name of San Antonio city changed from Lake Jovita in 1931.

⁴⁷ PINELLAS.—County redistricted in 1936, and partially redistricted in 1940; comparative figures shown wherever possible. Part of Clearwater city detached in 1933. Name of Oldsmar city changed from Tampashores in 1937. Pass-a-Grille Beach town returned in 1930 as Pass-a-Grille. No population reported in 1940 for those parts of Gulfport town in precinct 44, Clearwater city in precinct 50, Dunedin city in precinct 65, for that part of precinct 18 outside St. Petersburg city, and for that part of precinct 55 outside Clearwater city.

⁴⁸ POLK.—Precincts 8 and 23 organized from parts of 5 in 1932 and 1936, respectively, and parts of precinct 5 annexed to 36 and 37 in 1936. Precinct 17 organized from parts of 4 and 27 in 1932. Parts of Winter Haven city reverted to precincts 6, 12, 21, 30, and 41 in 1934, and parts of Lakeland city reverted to precincts 10 and 25 in 1933 and 1939. Auburndale city returned in 1930 and 1920 as in precinct 6 only; Haines City, as in precinct 15 only; Lake Wales city, as in precinct 28 only; and Lake Hamilton town, as in precinct 31 only. Highland Park village, geographically located in precincts 28 and 40, had no population in 1940 in precinct 28; not returned separately in 1930. The 1930 total for Winter Haven city includes population (300) of parts of the city which reverted to precincts 8 and 30 in 1934.

⁴⁹ ST. JOHNS.—County total for 1930 includes population (1,341) of old precinct 19, taken to form 21 and new 20, in 1933. New precinct 19 organized from part of 18, including part of St. Augustine city. Parts of St. Augustine city reverted to precincts 6, 7, 13, 14, 15, 17, new 19, and 22; and number of precinct 22 changed from 20, in 1933. No population reported in 1940 for that part of precinct 15 outside St. Augustine city. The 1930 total for St. Augustine city includes population (1,341) of old precinct 19, taken to form 21 and new 20, in 1933.

⁵⁰ ST. LUCIE.—Changes in precincts, including parts of Fort Pierce city, are as follows: Precinct 8 organized from part of 2, and precincts 7 and 9 from parts of 6, in 1930, but not returned separately in that year. Parts of Fort Pierce city reverted to precincts 1, 4, 6, and 8, and parts of precincts 2, 4, and 6 annexed to Fort Pierce city, in 1939. Names of precincts 2 and 6, Fort Pierce, returned in 1930 as North Fort Pierce and South Fort Pierce, respectively. No population reported in 1940 for that part of Fort Pierce city in precinct 4.

NOTE.—Other places of more than 5,000 (Bartow, Clearwater, Coral Gables, Daytona Beach, Fort Lauderdale, Fort Pierce, Gainesville, Hollywood, Lake City, Lakeland, Lake Wales, Lake Worth, Marianna, Miami, Miami Beach, Palatka, Plant City, St. Petersburg, Sanford, Sarasota, Tallahassee, Tampa, West Palm Beach, and Winter Haven cities, and River Junction town) have no wards.

Metropolitan districts.—Metropolitan districts have been set up for use in the 1940 Census of Population in connection with each city of 50,000 or more, two or more such cities sometimes being in one district. The general plan is to include in the district, in addition to the central city or cities, all adjacent and contiguous minor civil divisions or incorporated places having a population of 150 or more per square mile. In some metropolitan districts a few less densely populated contiguous divisions are included on the basis of special qualifications. A metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social, and, often, administrative interests.

Table 7 shows the population of the Jacksonville metropolitan district and its constituent political units in 1940 and some comparative figures for 1930, together with the increase during the decade. In 1940 the Jacksonville metropolitan district had 195,619 inhabitants, while in 1930 the district as then constituted had a population of 148,713. The redistricting of Duval County in 1940 necessitated a redefinition of the boundaries of the metropolitan district, resulting in a slight increase in the area included in the district; the effect upon the population increase in the district

is not ascertainable. Comparative figures for 1930 cannot be shown for the precincts.

NUMBER OF INHABITANTS

Table 7-B shows the population of the Tampa-St. Petersburg metropolitan district and its constituent political units in 1940 and some comparative figures for 1930, together with the increase or decrease during the decade. In 1940 the Tampa-St. Petersburg metropolitan district had 209,693 inhabitants, while in 1930 the district as then constituted had a population of 169,010. The redistricting of Hillsborough and Pinellas Counties between 1930 and 1940 necessitated a redefinition of the boundaries of the metropolitan district, resulting in a slight change in the area included in the district; the effect upon the population increase in the district is not ascertainable. Comparative figures for 1930 cannot be shown for the precincts.
